Product Description

Adjustable L100 Pallet Racking for Easy Warehouse and Supermarket Storage Solutions

Product Description

A light duty rack refers to a type of storage rack system that is designed to hold lighter weight loads compared to heavier duty industrial racking.

Intended for storing lighter items like boxes, cartons, small parts, files, etc. - not heavy palletized goods.

Typically has lower weight capacity per shelf level, often in the range of 100-500 lbs per shelf.

Shelf depths are usually shallower, around 12-18 inches deep.

Shelves are often adjustable to accommodate different product sizes.

Commonly used in retail stockrooms, offices, garages, warehouses for lighter storage needs.

More affordable and easier to install than heavy duty industrial pallet racks.

Provides good visibility and accessibility to stored items on the shelves.

Suited for manual handling rather than powered equipment like forklifts.
